

Water-Shed Inswing Sill

Stop Water At The Door

The first-of-its-kind, Water-Shed sill, is an all-new patent-pending exterior door inswing sill that actually takes any water that might infiltrate past the door sill and sweep, and channels it back outside the home where it belongs.

With its unique design, Water-Shed offers a built-in weep system, giving your entry door an advantage over other door systems. Using the Water-Shed sill on your entry system will help eliminate costly water leaks inside the home.

- Same Price As Traditional Adjustable Sill
- Special Bumper Sweep Compensates for Gaps; No Adjustment Needed
- Stops Costly Leaks

Durable Sweep

Our black flexible rubber bumper sweep has two fins, large interior bulb, and a built-in exterior fin to deflect water run off. This larger bumper sweep compensates for gaps; no adjusting needed.

Butyl End Seal Gasket

The butyl end seal gaskets not only bond the sill to the jamb leg, but also provide a tight seal against water infiltration.

The Water-Shed sill is a patent-pending configuration brought to you by Codel Entry Systems. Contact us to learn more.
